## **PYRUS communis 'CONFERENCE'**

Conference pear, Pear 'Conference'

Maintenance advice: At the end of winter, cut down any incumbent branches, to ventilate and maintain a harmonious and balanced form. Shorten any branches too long at a young

age and then every 4-5 years to rejuvenate. For trellised forms, in summer, reduce spring shoots by 2/3 in length, leaving 5-6 leaves per branch, and at the end of winter cut down any twigs of more than 15cm long to just above the third bud from the base.

Botanical/Horticultural origin: Horticultural origin: bred in England before 1885

Use group: Fruit TreesHeight at 10 years: 4 mWidth at 10 years: 2 m

Growth: Medium Fragrance: No

Exposure: Full sun

Evergreen/Deciduous:
Deciduous

Shape: tree like

Colour of leaves: Green

Colour of flowers: White

Soil type: IndifferentUses: Fruit tree, Free

standing specimen,
