

PYRUS communis 'DOCTEUR JULES GUYOT'

Pear 'Docteur Jules Guyot'

Maintenance advice: At the end of winter, cut down any incumbent branches, to ventilate and maintain a harmonious and balanced form. Shorten any branches too long at a young age and then every 4-5 years to rejuvenate. For trellised forms, in summer, reduce spring shoots by 2/3 in length, leaving 5-6 leaves per branch, and at the end of winter cut down any twigs of more than 15cm long to just above the third bud from the base. Cut off more on younger plants. Take some of the fruit in June to give more quality to those remaining.

Botanical/Horticultural origin: Horticultural origin : breeder Ernest Baltet, Troyes (FR) 1870

Use group: Fruit Trees

Height at 10 years: 6 m

Width at 10 years: 4 m

Growth: Medium

Fragrance: No

Exposure: Full sun

Evergreen/Deciduous:
Deciduous

Shape: tree like

Colour of leaves: Green

Colour of flowers: White

Soil type: Indifferent

Uses: Fruit tree, Free standing specimen,
